Michael Vreeken

Full Stack Developer

Passionate Freelance Full Stack Web Developer with 10+ years of experience, seeking full time position. Saved Able Inc. 40 work hours per month by writing a script to merge their 1 million+ item inventory database. Consistently grew sales by 10% year-over-year through superior interpersonal relationships at The Home Depot. Creatively solves problems, meshes seamlessly in a team, effectively communicates, and never ceases to learn and grow professionally. Also loves and will work for carrots.

RECENT PROJECTS

LALSRM (In Development)

The official website for the Los Angeles Live Steamers Railroad Museum club, a 501(c)(3) organization. Features include a public facing static site, member logins with different levels of permissions, web content editing done in browser, payment processing & invoicing, surveys with chart.js result charts, volunteer hours tracking, donation processing, an event calendar, newsletters, email campaigns, a membership roster, and member forum.

★ **Tech Stack:** PHP, Laravel, MySQL, JavaScript, Vue.js, Bootstrap, Stripe API, AJAX, Git, Webpack

https://www.MyBudget123.com

MyBudget123 is a budgeting web app that calculates and displays a running list of your finances out 5 years letting you know when, if ever, your incomes vs bills will ever leave you in debt/overdrawn, or even if you'll ever have pockets of extra cash to burn.

★ **Tech Stack:** PHP, Laravel, MySQL, JavaScript, Vue.js, Bootstrap, Stripe API, AJAX, Git, Webpack

https://www.DnDCompanion.com

DnD Companion is a web and android app for Dungeons & Dragons players, specifically the game master. It has a variety of helpful features including an NPC generator with a unique set of wonderful attributes to give your NPCs life, 175+ JSON "D100" lists to randomly generate ideas, and several community-driven content sections with content voting and commenting.

★ **Tech Stack:** PHP, Laravel, MySQL, JavaScript, Vue.js, Bulma, Android, Java, AJAX, Git, Webpack

https://www.SocialSubs.app

SocialSubs is a web app that displays a variety of content synced with a movie that you watch. It gives a unique and exciting new way to watch your beloved movies by displaying behind the scenes photos, movie mistakes, user polls, interesting trivia questions, and timestamped user comments from fellow movie fans, all while you watch the movie.
